

Adding a group login page to multiple computers

Start on the Child Login page and select 'Set up school computers for children'

Set up school computers for children

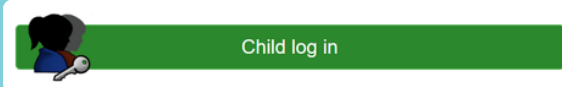

'This computer'

'Other school computers'

Log in directly at www.tapestryjournal.com using the Child Login button

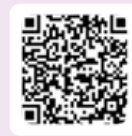

Use four magic words

This option allows pupils to log in using four magic words that Tapestry will generate for you. They will need to go to www.tapestryjournal.com, click the 'Child log in' button and choose 'School'. They should see an option there to type in the four magic words you have generated for them.

Use a QR code

This creates a QR code that is unique to a group login page. You can print and display this QR code around your classroom so that the children can scan it using the camera on a device and be taken directly to Tapestry.

Email yourself a magic link

This option provides you with a link that you can send to yourself. Make sure that you open it on the device, user profile, and browser you'd like the Group Login page to be added to.

If you need more detailed instructions, you can visit our tutorial for [setting up group login pages](#).
