

Tapestry Childhood Education Platform

Hello,

A parent has shown interest in using Tapestry at your setting or school, so we'd love to tell you a little bit more about our software and how we can help you and your provision.

Tapestry is the original and leading Childhood Education Platform for Early Years and Key Stage 1 and 2, in mainstream and SEND provision. Every day, around 14,500 settings, childminders and schools use Tapestry to nurture partnerships with families, support the learning and development of the children in their care, and run the day-to-day management of their setting.

Available both as a website and app, Tapestry's comprehensive tools help you build strong relationships with families and reduce barriers to engagement; document each child's unique learning and development; and streamline your planning, monitoring and reporting processes through Early Years to KS1 and 2, for mainstream and special provision.

Nurseries and childminders can also benefit from Tapestry's Nursery Management Software, which provides clear, transparent and accurate invoicing, smart occupancy planning and in-app attendance registers for children and staff.

At Tapestry we believe in a Childhood Education Platform that is convenient and reliable. We also believe that a high-quality product shouldn't cost a fortune. From as little as £2.96/per child a year, every subscription comes with the tools you need, including unlimited data, unlimited staff and relative profiles, custom monitoring and reporting, daily care diaries, quick and secure messaging... and loads more.

Get started for free with our no-obligation trial: tapestry.info/free-trial/
